

Bowen State High School is an outstanding school striving to meet the requirements of students who have multiple, diverse and ever-changing needs. Our school is a well-established centre of learning with a history spanning five decades.

The Mission Statement of Bowen State High School is to “Provide a Quality Education in a Caring, Disciplined Environment”. This Mission Statement is what drives our commitment to students and parents to provide the best learning opportunities available in an environment which fosters respect, responsibility and safety.

Our aim is to ensure that:

- all students are successfully engaged in learning and achieving at the highest level;
- young people at our school are meeting basic literacy and numeracy standards and that these standards are improving overall;
- our school promotes social inclusion and reduces educational disadvantage;
- our students excel by international standards;
- our young people make a successful transition from school to work and further study; and
- the community is confident in the ability of our school to meet their requirements.

Bowen State High School is dedicated to providing all students with the opportunity to fulfil their goals by assisting them to become self-motivated, self-assured, disciplined and responsible young adults, capable of facing the challenges of this era. This dedication is supported through a range of school based initiatives, programs and resources which include:

- Literacy and numeracy classes within the Junior School to help build a foundation for academic success
- Adopting a leading pedagogical framework which is supported by teaching and learning coaches to provide teaching staff development
- EATSIPS. (Embedding Aboriginal & Torres Strait Islander perspectives in schools)
- Indigenous Programs to help ‘close the gap’ between Non Indigenous and Indigenous Students in terms of achievement, engagement and cultural awareness
- Resources such as the Trade Training Centre and Commercial Kitchens which will help support and enhance senior student pathways into the work force
- Take Home Laptop Program so every student has access to a laptop to engage with learning wherever and whenever required

We are motivated by, and focused on, the school motto “Prepared For All Things” and are committed to providing a centre of learning which prepares students for their life ahead.
